

## Planned theme system improvements for Drupal 4.7

Menu system integration  
(Ber and Adrian were working on this, no progress recently)

Make it easier to structure site

Make links themable or configurable (eg. 'read more' links on node pages)

Make it easier to control node views

Make forms themable  
(Gerhard et al. were working on this, just started)

Make it possible to reorganize forms

Multiple block regions  
(Nedjo and chx were working on this, no progress recently)

Make it possible to create complex pages (introduce notion of page page templates, better profile pages)

Better separation of administrator functionality and user functionality (being discussed)

Make it feel less daunting to administer site

PHPTemplate engine in core

Make it easier to theme site
